## WORK EXPERIENCE

### Work Practice FrontEnd Junior

**Silk Software House**

📅 March 2023 - June 2023          📍 Warsaw

- Developed and modified front-end applications, including a graphical simulation of Parent-Child inheritance in React with hooks.
- Converted a React.js project to TypeScript to enhance type safety and code maintainability.
- Built a Tic-Tac-Toe game with header and footer components using React and its hooks.

## PROJECTS

### My diploma Project "Card Your Time" (Turn-based / Rouguelite / Card game)

**Team leader / Programmer / Graphics**

📅 September 2023 - current

- Creating script for Random Dungeon Generation
- Designed and implemented the main system for turn-based gameplay.
- Led weekly team meetings to ensure alignment and progress.
- Planned and assigned weekly tasks to team members, ensuring timely completion.
- Identified and resolved problems and bugs to maintain project stability.
- Created comprehensive documentation for the project to facilitate team understanding and future development.

**I have many more projects, but they are hidden in my GitHub due to PJATK policy. If you are looking for specific project and technologie, please contact me.**
